

C20 Silent Bottom Bar

Available for all fabrics and control options

Introducing the latest addition to our bottom bar range, the C20 Silent Bottom Bar features an updated architectural design for use with our roller shades.

Two discreet slot allocations allow for a bubble seal offering a quiet solution and a fabric brush for an improved light block-out.

AESTHETICAL FEATURES:

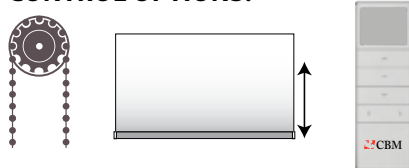

- ✓ Available with or without fabric brush & bubble seal
- ✓ Available for all sun control, light filtering and blackout fabrics
- ✓ Available in white, anodized, metallized bronze, gunmetal gray & black.

FUNCTIONAL BENEFITS:

- Compatible with CBM's chain drive, cordless and motorized controls
- Back and bottom allocations are interchangeable to hold either a bubble seal or fabric brush
- A clear bubble seal can be added to assist maintaining a quiet environment, ensuring noise is muted when the bar comes in contact with window frames
- A fabric brush can be utilized to close up extra light gaps on cassette dim out roller shades with Enclosure 90
- Available with optional steel handle for CBM Cordless Roller Shades
- Contact Customer Service for Samples & Pricing
